KITCHEN APPLIANCES / 2026

Kitchen Appliance Solutions

SELECTION / SUPPLY / TECHNICAL COORDINATION

PROJECT APPLIANCE
SUPPORT

COOKING / COOLING / DISHWASHING / VENTILATION

Dubai, United Arab Emirates

Complete appliance support. Coordinated with the kitchen.

Neverend provides kitchen-appliance selection, supply and technical coordination for residential, hospitality and development projects.

Each appliance is reviewed against the kitchen design, available space, required performance, functionality and project budget - then coordinated with cabinetry and relevant site services.

PROJECT-LED APPLIANCE SUPPORT

From product selection and technical coordination through delivery, installation and commissioning.

RESIDENTIAL

Private residences and apartment developments.

HOSPITALITY

Guest kitchens, serviced apartments and hospitality projects.

DEVELOPMENTS

Multi-unit and larger-scale residential developments.

INTEGRATED COORDINATION

Products coordinated with cabinetry, electrical, plumbing and ventilation requirements.

Integrated appliance support

01

Appliance Selection

Model comparison based on use, size, capacity, features and budget.

02

Specification

Product specifications and technical information for project review.

03

Cabinetry Coordination

Built-in dimensions, clearances and integration with kitchen drawings.

04

Services Coordination

Electrical, plumbing and ventilation requirements coordinated before installation.

05

Supply & Delivery

Product procurement, project supply and delivery scheduling.

06

Installation & Commissioning

Installation coordination followed by testing and commissioning.

02

Appliance Categories

A complete appliance offering can be developed around the project brief, kitchen layout and available installation conditions.

PROJECT SUPPORT

SELECT → COORDINATE → SUPPLY

SCOPE

Core capabilities

- ✓ Built-in ovens
- ✓ Hobs and cookers
- ✓ Microwave ovens
- ✓ Extractor hoods
- ✓ Refrigerators and freezers
- ✓ Dishwashers
- ✓ Freestanding and integrated appliances

SELECTED APPLIANCE BRANDS

- BEKO
- WHIRLPOOL
- BOSCH
- ARCELIK
- ARISTON

03

Selection & Specification

Suitable models are proposed only after reviewing intended use, dimensions, capacity, features, installation requirements and project budget.

PROJECT SUPPORT

SELECT → COORDINATE → SUPPLY

SCOPE

Core capabilities

- ✓ Appliance selection and comparison
- ✓ Product specifications and technical information
- ✓ Built-in and freestanding product options
- ✓ Review of dimensions and capacity
- ✓ Feature and functionality review
- ✓ Coordination with kitchen drawings and cabinetry
- ✓ Product supply and delivery
- ✓ Installation coordination

SELECTED APPLIANCE BRANDS

- BEKO
- WHIRLPOOL
- BOSCH
- ARCELIK
- ARISTON

04

Technical Coordination

Correct appliance integration depends on early coordination between the selected products, cabinetry and site services.

PROJECT SUPPORT

SELECT → COORDINATE → SUPPLY

SCOPE

Core capabilities

- ✓ Product dimensions and built-in openings
- ✓ Required clearances and ventilation
- ✓ Cabinetry and joinery integration
- ✓ Electrical load and connection requirements
- ✓ Plumbing and drainage requirements
- ✓ Ventilation and extractor requirements
- ✓ Coordination with kitchen designer and contractor
- ✓ Installation planning and issue prevention

SELECTED APPLIANCE BRANDS

- BEKO
- WHIRLPOOL
- BOSCH
- ARCELIK
- ARISTON

From kitchen brief to commissioning.

A structured workflow keeps product selection, cabinetry and site requirements aligned before the appliances reach site.

PROJECT COORDINATION

Products, cabinetry and services are reviewed together to reduce installation conflicts and late-stage changes.

01

REVIEW

Kitchen design, intended use and project budget.

02

SELECT

Compare suitable appliance models and options.

03

SPECIFY

Confirm dimensions, capacity and technical data.

04

COORDINATE

Align cabinetry, electrical, plumbing and ventilation.

05

SUPPLY

Procure, schedule and deliver appliances to the project.

06

COMMISSION

Coordinate installation, testing and commissioning.

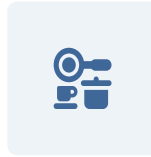

Selected appliance brands.

Brands are selected according to project requirements, technical suitability and market availability.

PROJECT-BASED SELECTION

The appliance schedule is built around performance, space, functionality, integration requirements and project budget.

BEKO

Selected by project

WHIRLPOOL

Selected by project

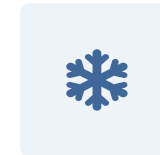

BOSCH

Selected by project

ARCELIK

Selected by project

ARISTON

Selected by project

Kitchen appliance solutions for different project types.

The same coordination process can be scaled from a single private residence to hospitality and larger development requirements.

RESIDENTIAL

Private residences, villas and apartments where appliance selection must align closely with kitchen design, space and lifestyle requirements.

HOSPITALITY

Hospitality and serviced-living projects requiring coordinated specifications, consistent product selection and installation planning.

DEVELOPMENTS

Larger residential or mixed-use developments where standardized appliance packages can be coordinated across multiple units.

Product categories and models remain subject to project requirements and market availability.
